THE SANDBOX

A DECENTRALIZED GAMING PLATFORM MADE BY PLAYERS

The Sandbox is a virtual world where players can build, own, and monetize their gaming experiences in the Ethereum blockchain using SAND, the main utility token of the platform.

As a player, you can create digital assets (Non-Fungible Tokens, aka NFTs), upload them to the marketplace, and drag-and-drop them to create game experiences with The Sandbox Game Maker. The Sandbox secured over 50 partnerships like Atari, CryptoKitties, Shaun the Sheep and more... to build a fun creative "play-to-earn" Gaming platform, owned and made by players. The Sandbox aims to bring blockchain into gaming, attracting both crypto and non-crypto game enthusiasts by offering the advantages of true-ownership, digital scarcity, monetization capabilities, and interoperability.

PROJECT HIGHLIGHTS

- **Decentralization:** All game assets are represented by NFTs, securing true ownership for players and collectors. SAND will come with core game usage, staking utilities and reward systems assigned to the token, as well as governance mechanisms that will further decentralization and allow users to govern the platform.
- **LAND Presales:** Users have acquired a location within the virtual world gaming platform during the first rounds of presale since December 2019, some of which sold out within minutes and generated more than $1 million USD in sales; the overall value of the The Sandbox metaverse is planned to reach over $20M.
- **Governance:** SAND holders will be able to participate into governance decisions of the platform via DAO mechanisms, where they can exercise voting rights on key elements of The Sandbox ecosystem
- **Community support:** All previous token sales (LAND), representing more than $1 million USD, sold out quickly and more than 15,000 users have connected their wallets to the project. A community of +750,000 followers supports the franchise.
- **Experienced team:** The Sandbox team has developed two sandbox-genre mobile games that generated more than 40M downloads. The team includes video-games experts from AAA companies and top-notch blockchain engineers who co-authored the ERC-1155 NFT token standard and more.

WHAT IS SAND

SAND is an essential part of The Sandbox platform and we are working on establishing key mechanics that makes it intrinsically tied to The Sandbox platform and its value.

As pioneers in The Sandbox will be taking the highest risk initially to establish their games and they should be driven also by the potential upside that they could receive as the first creators on The Sandbox platform.

1. **Access The Sandbox platform:** Players spend SAND in order to play games, buy equipment, or customize their Avatar character. Creators

THE SANDBOX

Testing Summary

PASS

CERTIK believes this smart contract passes security qualifications to be listed on digital asset exchanges.

Dec 10, 2019

Score 93

spend SAND to acquire ASSETS, LANDS, and through Staking. LAND Sales drive demand for SAND to purchase LANDS. Artists spend SAND to upload ASSETS to the Marketplace and buy Gems for defining Rarity and Scarcity.

2. **Governance:** SAND is a governance token that allowsholders to participate in Governance decisions of the platform, using a DAO structure. They can exercise voting rights on key elements such as Foundation grant attributions to content and game creators and feature prioritisation on the platform Roadmap. SAND owners can vote themselves or delegate voting rights to other players of their choice.
3. **Staking:** SAND allows for staking, which allows for passive revenues on LANDS: you get more SAND by staking it. This is also the only way to get valuable Gems and Catalysts, needed for ASSET creation
4. **Fee Capture model** = 5% of all transaction volume carried out in SAND tokens (Transaction Fees) shall be allocated with 50% to the Staking Pool as rewards for token holders that Stake SAND tokens and 50% to the "Foundation."
5. **Foundation:** The role of the Foundation is to support the ecosystem of The Sandbox, offering grants to incentivize high quality content & game production on the platform. To date, the Foundation has funded over 15 game projects and granted 100 artists to produce NFTs ahead of the public Launch in December 2020. The overall valuation of the metaverse grow through the valuation of all games funded by the Foundation, creating a virtuous circle to enable funding bigger games.

KEY ACHIEVEMENTS

- **Funding**: We have closed a Seed Round with a total of $4.21M USD raised.
- **Team**: We have assembled the right senior team to execute our vision: 42 resources located in our 3 offices with 28 FTE in Argentina, 11 in France, 2 in Korea and 1 in Japan.
- **Revenue**: The two first rounds of LANDs presale (2.5% then 5% of the total map supply) sold out in almost 1 hour -- exciting success despite the bearish crypto market in December 19 then February 2020. Total Revenue generated of 1,400 ETH (approx $300,000 USD).
- **Community:** Growing with over 10,000 members on our Discord. Our NFT maker VoxEdit has been downloaded overall 65,000 times and the 100 artists part of our Creator's Fund have made 3,000 assets already. We have over 3,500 accounts on our Dashboard.

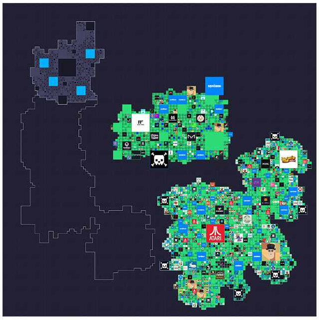
FEATURED IN THE PRESS

- CEO Arthur published a Medium article about *Blockchain Metaverse: Where Players Can Build, Own, and Control a Platonic Republic of Gaming* which has been clapped over 500 times
- COO Sebastien was quoted repeatedly on *CoinTelegraph among 50 Crypto Experts* on his perspectives for 2020 and look back on 2019 articles.
- The Sandbox ranked *13th among the Top 50 Blockchain Games Companies of 2020 report by DappRadar*, while Animoca Brands is ranking 5th. This confirms our leadership position in the space

THE SANDBOX METAVERSE

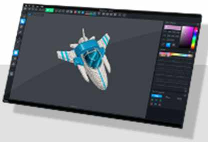


The Sandbox Metaverse is made up of LANDs, which are creative sandboxes owned by players to create and monetize games. There are 166,464 LANDs (408*408) in the metaverse, and each LAND is a physical space that comes with a pre-built, default terrain that can be terraformed and modified by the owner or another player authorized by the owner. LANDs are used to publish your game or can be rented to game creators who want to publish theirs.

Over 23.5% of the map has been sold out within minutes, in excess of $1,000,000 USD of sales

A USER-GENERATED CONTENT ECOSYSTEM

The Sandbox gaming ecosystem consists of three integrated products that together provide a comprehensive experience for user-generated content (UGC) content production. The Sandbox further benefits users by allowing them to secure copyright ownership of user-created content through blockchain and smart contracts.



VOXEL EDITOR

www.voxedit.io

VoxEdit allows you to create voxel models, rig them, and animate them quickly. Download our free Beta now to start creating!

MARKETPLACE

www.sandbox.game/shop

An open market environment allowing the free trading of in-game tokenized ASSETS that is the main dashboard of The Sandbox platform.

GAME MAKER

www.sandbox.game/play

Allows you to build, share, and monetize your amazing games on our online 3D gaming platform.

BLOCKCHAIN GAMING

The Sandbox uses several tokens types to ensure a **circular economy** between all the profiles of users who will interact with its platform: players, creators, curators, land owners:

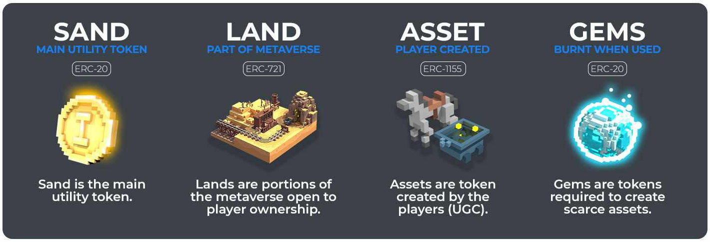
- **SAND:** The ERC-20 token that will be used within The Sandbox as the basis of all the ecosystem's transactions and interactions.
- **LAND:** Digital piece of real estate in The Sandbox metaverse that players can buy to build experiences on top of. Once you own a LAND, you will be able to populate it with Games and Assets. Each LAND is a unique (non-fungible) token lying on the public Ethereum blockchain (ERC-721).
- **ASSET:** Token created by the players (UGC) using ERC-1155 standard and that can be traded on the marketplace, with main utility to serve in The Sandbox Game Maker.

The Sandbox's ecosystem and smart contracts were thoroughly examined and tested by the CertiK software to prove that they are free of vulnerabilities. The audit was led by a team of experts with decades of experience under their belts, guaranteeing the security and validity of our LAND, LANDSale and SAND smart contracts.



SAND
MAIN UTILITY TOKEN
ERC-20
Sand is the main utility token.

LAND
PART OF METAVERSE
ERC-721
Lands are portions of the metaverse open to player ownership.

ASSET
PLAYER CREATED
ERC-1155
Assets are token created by the players (UGC).

GEMS
BURNT WHEN USED
ERC-20
Gems are tokens required to create scarce assets.

Non-fungible tokens (NFTs) are virtual tokens for digital scarcity, security and authenticity. They are unique/distinct, indivisible and not interchangeable.

PARTNERSHIPS

Secured +50 partnerships to develop content on the platform, including brands like Shaun the Sheep, dApp game studios like Dapper Labs (CryptoKitties), investors such as **Square Enix** (Final Fantasy, Tomb Raider), and iconic game companies like **ATARI** (Rollercoaster Tycoon, Pong).

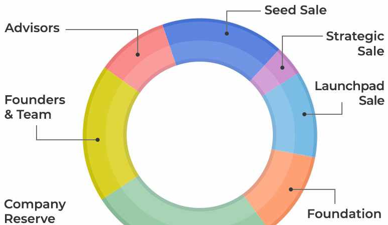
SAND TOKEN SALE AND ECONOMICS

Launchpad Allocation	360,000,000 SAND (12% of Total Token Supply)
Max Number of Winning Lottery Tickets	15,000
Allocation Per Winning Ticket	200 USD (24,000.96 SAND)
Public Sale Vesting Period	No lockup
Seed Sale Token Price	1 SAND = 0.0036 USD
Seed Sale Allocation	17.18% of Total Token Supply
Seed Sale Vesting Period	12-month cliff; 20% unlocks every six month afterward
Strategic Sale Token Price	1 SAND = 0.0050 USD
Strategic Sale Allocation	4% of Total Token Supply
Strategic Sale Vesting Period	12-month cliff; 20% unlocks every six months afterwards
Token Type	ERC20
Token Distribution	Within 15 days after the end of the token sale

TOKEN ALLOCATION



HOW CAN CREATORS MAKE REVENUE?

- **Create Voxel ASSETS:** Build ASSETS on Voxedit, import and sell on the marketplace as NFTs.
- **Build Games on the Game Maker**: Build and monetize games on the Game Maker through your LANDS.
- **Own a LAND**: Buy a LAND in one of our LAND Sales. Rent them or populate them with content to increase its value!

WHAT IS THE GAME MAKERS FUND?

In 2019, we launched a $2M Creator Fund to help players build, share, and monetize games on The Sandbox. This fund will be supervised by the Foundation's DAO to support the platform ecosystem, offer grants to incentivize production of high quality content and games.

The overall valuation of the metaverse will grow the the valuation of all games funded by the Foundation, creating a virtuous circle to enable funding of larger games. Creator benefits for support from the Game Makers Fund include:

- Free prime exposure for games in The Sandbox
- Retain full ownership and copyright for your games
- Receive free LAND parcels in The Sandbox metaverse
- In addition to funding, retain the ability to monetize your content with our SAND cryptocurrency
- Trade games and ASSETS on our marketplace
- Help define a new gaming future as part of our Game Maker community

PLAY. CREATE. OWN. GOVERN. EARN.

WELCOME TO THE METAVERSE

The Sandbox decentralized platform allows players and creators to own a piece of our gaming metaverse (LAND), participate in the governance and economy (SAND), while creating and enjoying a simple way to benefit from their playing time.

In the coming year, our experienced and dedicated team will build an unique way to play in a virtual world where you can play, create, collect, earn, govern, and own anything in the game.
